About Me

I started learning web development through freecodecamp.com, where I discovered my passion for developing. Since then I've continued coding and learning through various online resources.

You can view all of my projects here on my Portfolio site / Github.

My Portfolio: <https://ebmnm.github.io/Portfolio/>

My Github: <https://github.com/Ebmnm>

Skills

HTML CSS/SCSS Javascript NodeJS MongoDB Git

Visual Studio Bootstrap Github React

Experience

March 2021 -
November 2021

YelpCamp

HTML CSS NodeJS Javascript MongoDB Bootstrap

Some of its features include searching for campgrounds setting title, description, or author username, geocoded interactive campground map, user authorization/authentication using Passport.js, sign up for an account and optionally upload an avatar, create and edit campgrounds, review a campground and see the average rating of campgrounds, admin permissions that allow the editing/deletion of other users' campgrounds and reviews.

Crowdfunding Product Page

HTML CSS Javascript

This project is a fundraising mock website which includes a modern design, validations, and options to select a pledge with an updated amount/progress bar.

Productivity Application

HTML CSS Javascript React

A Productivity Web Application featuring Todo-Like functionality built with React, allowing users to set Todos, Tasks, or Goals and ability to add details such as the time of completion and todo info.

Coffee Roasters

HTML CSS React

A website for selecting and ordering coffee. A modern design with mobile responsiveness and complete functionality.

Shoe Ecommerce Webpage

HTML CSS React

An Ecommerce Website built with React featuring cart functionality and a modern responsive design.

Carved Rock Fitness / Fylo Landing Page

HTML CSS

The following are coding challenges completed to demonstrate CSS skills. Carved Rock is a mock site for a rock climbing webpage, and Fylo is a mock landing page for a file storing service. These designs have some nice layout challenges in them. A perfect way to practice your Flexbox and/or Grid skills.

RGB Color Game

HTML CSS Javascript

A fun RGB theme guessing the color game developed using Javascript.

Education

Colt Steele's Web Developer Bootcamp

November 2020 - March 2021, Remote
